DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A peptide chemically modified with polyethylene glycol (PEG), including a sequence of 18 amino acids, wherein said sequence of 18 amino acids is constituted from alternately arranged two hydrophobic sides and two hydrophilic sides in G-helix structural model depicted by Edmundson wheel plots, one of said hydrophobic sides comprises 5 to 7 amino acids and 80 mole% or more of this side comprises hydrophobic amino acids, one of said hydrophilic sides comprises 5 or 6 amino acids, and 80 mole% or more of this side comprises hydrophilic amino acids, and 50 mole% or more of this side comprises an amino acid selected from the group consisting of arginine and lysine, the other of said hydrophobic sides comprises 2 to 4 hydrophobic amino acids, and the other of said hydrophilic sides comprises 3 to 5 amino acids and 80 mole% or more of this side comprises hydrophilic amino acids.

Applicants should elect ONE polypeptide sequence in which all variables are defined: a specific amino acid sequence, Pegylation site(s), and PEG molecular weight range.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1-28.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The generic claims are drawn to a broad array of structures that do not share a common core structure.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
